DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I comprising claims 1-24 and 40-50 in the reply filed on 12/20/2007 is acknowledged. Claims 25-39 and 51-56 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Request for Information under 37 CFR 1.105

Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application (see MPEP §§ 704.10 – 704.13). In response to this requirement, please provide a copy of any related and pertinent information, such as non-patent literature, published application(s) or patent(s) (U.S. or foreign), that was used to assist in the drafting of this application. This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete reply to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 and 40-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/617,588 Page 3

Art Unit: 1797

Claims 1 – 24 and 40 – 50 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: Regarding claims 1 and 40, the scope of the term "multi-dimensional" or "multi-directional" stimulus is indefinite and therefore unclear. For example, does the stimulus include both a digital display readout of the concentration level of the detected vapor and an audible alarm that sounds continually over time as long as the vapor is being detected or once upon initial detection? Does the stimulus include an audible indication, such as a computer-generated voice readout, of the concentration level of the vapor detected? The scope of the term "relative" concentration is unclear. Is an audible alarm generated for a range of vapor concentration levels? Does the device display a specific numeric value for the vapor concentration level in addition to an audible signal, such as an alarm?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

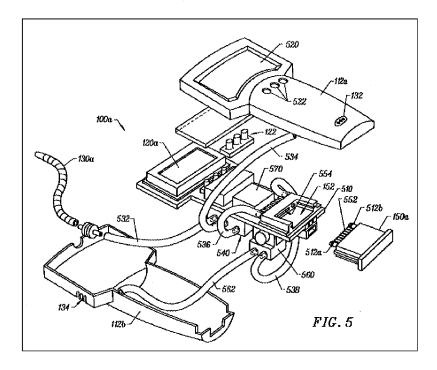

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8 - 11, 13, 14, 40 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Sunshine et al. (U.S. Pat. No. 6,085,576) ("Sunshine").

Regarding claims 1, 13, 14, 40 and 41, Sunshine teaches a vapor sensing device 100a comprising: a vapor analyzer, e.g., sensor module 150a; a controller, e.g., electronic unit 570, coupled to the vapor analyzer; and a sample probe, e.g., sampling wand 130a, comprising: a housing comprising a channel through which vapor sample is collected; a vapor cable, e.g., tube

Art Unit: 1797

532, coupling the vapor channel to the vapor analyzer; and a multi-dimensional use indicator, e.g., display 120a (see, e.g., figures 1 - 5; col. 5, line 45 - col. 8, line 38). The disclosed sensing device can determine the presence or identity and the concentration of one or more vapors (see, e.g., col. 4, lines 32 - 48; col. 11, lines 33 - 47).

Regarding claims 8 - 11, Sunshine teaches the incorporation of a filter (see, e.g., col. 6, lines 35 - 57).

Allowable Subject Matter

Claims 2-7, 12, 15-24 and 42-50 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 1797

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional cited prior art teach pertinent vapor analysis systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
